

Recycled Paper: Can You Spot the Difference?

ENVS 401: Sustainability in Action

Colton Allan, Sarah Johnson, Shauna Juravinski,
Trevor Nygren, Janessa Paetkau, Amanda Shurman,
& Laura Soucy

The Problem:

The College of Agriculture and Bioresources does not currently use paper with recycled content and is drastically behind other universities that are using recycled paper

The Objective:

To encourage the College of Agriculture and Bioresources to switch to a recycled paper

Supreme Basics 50% Recycled Paper:

- 50% post-consumer recycled material
- Trees sourced from Quebec
- Recycled material is sourced within a 1000km radius of processing factory
- Manufactured by Domtar in Quebec

How To Implement Our Plan...

- Gain faculty support through paper sample trials as well as showcasing student support for this initiative
- Centralized distribution system for the College of Agriculture and Bioresources to aid in the transition to a recycled paper source
- Potential to reduce costs by obtaining a discount from Supreme Basics

This was printed on Supreme Basics 50%
