

“ARE MY COFFEE CUPS REALLY RECYCLABLE?”

There are three grades of paper that Loraas Recycling is able to sell to its customers: old corrugated cardboard, old newsprint, and mixed paper. Coffee cups fit into the third category, meaning they're technically recyclable but fairly low quality and less useful for end users. In the end, it's much better for the environment and much less wasteful to use a reusable mug instead.

**RECYCLE YOUR COFFEE CUPS ON CAMPUS,
BUT REUSABLE MUGS ARE A BETTER OPTION.**
