

“WHY CAN’T PLASTIC CUTLERY BE RECYCLED?”

The machinery required to separate and sort recycling is impressive and very effective, but not without limits. Anything smaller than the size of a credit card (including plastic cutlery) cannot make it through the process without being filtered into the landfill. The best solution to this problem is to ditch the plastic cutlery entirely and switch to bringing your own reusable cutlery.

**AVOID USING PLASTIC CUTLERY WHEN POSSIBLE.
SWITCH TO REUSABLE CUTLERY!**
